

Monaco Square

Built-in Burner

Monaco Square Built-in Burner

decoflame® Monaco Square is a versatile burner designed to be integrated in tabletops. Monaco Square is suited for both in- and outdoor use.

The burner is made of brushed stainless steel and shielded with 8mm tempered glass. DecoFlame's unique finish makes this fireplace an elegant supplement to any in- or outdoor environment.

Installing a decoflame® Monaco Square is very easy. Simply create a 300x300mm cut-out in the tabletop and make sure that the burner does not collide with other objects below the tabletop. The burner can be manufactured with custom depth if desired.

Specifications

Materials:

Tempered Glass, steel and stainless steel.
