

Nice Tower

Nice is an all new series of bioethanol fires from DecoFlame.

As a first of all deco**flame**® models, the Nice series offers great versatility in use as either a free-standing fire column or a mobile table top fire: The burner is simply lifted out of the vase and can then be placed anywhere.

Nice is designed to add the cosiness and wild romantic of an open fire to long summer nights in your garden, on your terrace or in your livingroom. The deco**flame**® Nice Tower is available with vases of several colours in high gloss and also with a woven structure. A wheeled coaster for ease of relocation is available as option.

The deco**flame**® Nice burner featured in these models is made of brushed stainless steel, white powder-coated steel and is shielded by an optic white glass surround of 8mm thickness.

Specifications
